Academic Appointments

University of Florida, Gainesville, FL 2022–present
Associate Professor, Department of Industrial and Systems Engineering
Associate Director, Center for Applied Optimization
Affiliate, Department of Mathematics
Affiliate, Finance, Insurance and Real Estate Department

Georgia State University, Atlanta, GA 2018–2022
Associate Professor of Risk Management and Insurance, Robinson College of Business

University of Miami, Coral Gables, FL 2015–2018
Assistant Professor, Mathematics Department

Swiss Finance Institute – EPFL, Lausanne, Switzerland 2011–2015
Postdoctoral Researcher, Swissquote Chair in Quantitative Finance

Education

Ph.D. in Applied Mathematics 2007–2011
École Normale Supérieure - INRIA, Paris
Dissertation: *Epidemics and Percolation in Random Networks*
Advisors: Marc Lelarge and François Baccelli

M.S. in Probability and Finance 2006–2007
Paris VI (Pierre and Marie Curie) University

B.S. (Diplôme d'Ingénieur) in Applied Mathematics and Computer Science 2003–2006
École Polytechnique, Palaiseau, France

Research Interests

Quantitative Finance and Risk Management

Systemic Risk and Financial Networks

AI and Machine Learning in Finance

FinTech, Automated Market Makers, and Market Design

Stochastic Control, Games, and Multi-Agent Systems

Random Structures and Complex Networks

Economic Networks, Supply Chains & Resilience

Visiting Academic Appointments

INRIA Paris, MATHRISK Team *(Invited professor)* June-July 2021–2022, 2024–2026

IMSI, University of Chicago, USA *(Invited member)* March-May 2022

`Semester on "Decision Making and Uncertainty"`

IPAM, UCLA, California, USA *(Invited member)* March-April 2015

`Semester on "Broad Perspectives and New Directions in Financial Mathematics"`

Isaac Newton Institute, Cambridge, UK *(Invited member)* August-December 2014

`Semester on "Systemic Risk: Mathematical Modeling and Interdisciplinary Approaches"`

MSRI, Berkeley, California, USA *(Research member)* January-May 2012

`Semester on "Random Spatial Processes"`

Cornell University, Ithaca, NY *(Visiting scholar)* December 2011, 2013

Max-Planck Institut, Saarbrücken, Germany *(Visiting scholar)* January-March 2011

Imperial College, London, UK *(Visiting scholar)* April-July 2008

Industry & Applied Research Experience

Quantitative Researcher at HSBC Interest Rates Derivatives Group, Paris April–September 2007

Consulting and Model Validation for Major Banks, Finance Concepts, Paris 2007–2008

Visiting Scholar, Microsoft Research, Redmond April–May 2011

Curriculum Development

University of Florida — M.S. in Financial Engineering (proposed). Played an active role in developing the curriculum for an interdisciplinary graduate program jointly proposed by the Department of Industrial and Systems Engineering and the Department of Finance in the Warrington College of Business. The program was designed with three certificates in Financial Technology, Financial Mathematics and Optimization, and Risk Analysis and Management, as part of UF's planned West Palm Beach AI initiative.

University of Miami — M.S. in Mathematical Finance. Contributed to developing the interdisciplinary graduate program and its curriculum through collaboration between the Department of Mathematics and the Department of Finance in the School of Business. The program integrated mathematical training in probability, stochastic calculus, statistics and quantitative methods with applications in finance and risk management.

Research Funding & Awards

Risk Methodology for Supply Chain Networks:
PI, with A. Minca, NSF EAGER, Award No. 2534856, 2025–2027 ($299,999)

AI Compliance Officer:
Co-PI, with Z. Feinstein (PI) and I. Florescu, NSF CRAFT (Center for Research toward Advancing Financial Technologies), 2024–2025 ($100,000)

Technologies to Support Global Supply Chains Insurance and Reinsurance:
Co-PI, with A. Minca (PI), AXA Research Fund Award, 2020–2022 (€216,000)

Multi-Agent Reinforcement Learning in Large Financial Networks with Heterogeneous Interactions:
Co-PI, with A. Sulem, Research Award by the Institut Europlace de Finance, 2023

Optimal Distributed Stochastic Control and Application to the Management of Electrical Grid Flexibility: Co-PI, with A. Sulem (PI), Research Award by the Gaspard Monge Program for Optimization, Operations Research and their Interactions with Data Science, 2025

Dynamics and Stability of Complex Financial Networks:
J. Mack Robinson College of Business, Summer Research Grant, 2022

AMX doctoral fellowship, French Ministry of Research, France, 2007–2011

EGIDE fellowship for post-graduate studies, France, 2006–2007

Fellowship from the École Polytechnique Foundation, 2003–2006

Publications

Refereed journal papers

[J1] Cardinality-Constrained Portfolio Optimization with Clustering
(with Amirmohammad Ebrahimi and Hongcheng Liu)
Annals of Operations Research, forthcoming.

[J2] Markovian Equilibria of Stochastic Graphon Games with Jumps
(with Zhongyuan Cao and Agnès Sulem)
Pure and Applied Functional Analysis, forthcoming.

[J3] Ruin-Dependent Bivariate Stochastic Fluid Processes
(with Andreea Minca and Oscar Peralta)
Advances in Applied Probability, forthcoming.

[J4] Stochastic Graphon Games with Jumps and Approximate Nash Equilibria
(with Zhongyuan Cao and Agnès Sulem)
SIAM Journal on Control and Optimization, 64(3): 1859-1888, 2026.

[J5] Decentralized Prediction Markets and Sports Books
(with Maxim Bichuch and Zachary Feinstein)
Mathematical Finance, 36 (3), 465-480, 2026.

[J6] Central Limit Theorems for Price-Mediated Contagion in Stochastic Financial Networks
(with Zhongyuan Cao and Agnès Sulem)
SIAM Journal on Financial Mathematics, 16 (3), 1058-1103, 2025.

[J7] Graphon Mean-Field Backward Stochastic Differential Equations with Jumps and Associated Dynamic Risk Measures
(with Zhongyuan Cao and Agnès Sulem)
Finance and Stochastics, 29, 1139-1194, 2025.

[J8] Fire Sales, Default Cascades and Complex Financial Networks
(with Zhongyuan Cao and Agnès Sulem)
Mathematics and Financial Economics, 19, 225-260, 2025.

[J9] Limit Theorems for Default Contagion and Systemic Risk
(with Zhongyuan Cao and Agnès Sulem)
Mathematics of Operations Research, 49 (4), 2652-2683, 2024.

[J10] Blockchain Adoption and Optimal Reinsurance Design
(with Romain Deguest, Engin Iyidogan and Andreea Minca)
European Journal of Operational Research, 318 (1), 341-353, 2024.

[J11] Clustering Heterogeneous Financial Networks
(with Yudong Chen, Andreea Minca and Xin Qian)
Mathematical Finance, 34 (2), 425-466, 2024.

[J12] Social Distancing Game and Insurance Investment in a Pandemic
(with Andreea Minca)
Annals of Operations Research, 336, 2009-2036, 2024.

[J13] Bootstrap Percolation in Inhomogeneous Random Graphs
(with Nikolaos Fountoulakis and Konstantinos Panagiotou)
Advances in Applied Probability, 56(1): 156-204, 2024.

[J14] Contagion Risks and Security Investment in Directed Networks
Mathematics and Financial Economics, 17, 247-283, 2023.

[J15] Decentralized Payment Clearing using Blockchain and Optimal Bidding
(with Maxim Bichuch and Zachary Feinstein)
European Journal of Operational Research, 309 (1), 409-420, 2023.

[J16] A Central Limit Theorem for Diffusion in Sparse Random Graphs
(with Erhan Bayraktar and Suman Chakraborty)
Journal of Statistical Physics, 190 (3), 57, 2023.

[J17] Optimal Network Compression
(with Zachary Feinstein)
European Journal of Operational Research, 306 (3), 1439-1455, 2023.

[J18] Epidemic Spreading and Equilibrium Social Distancing in Heterogeneous Networks
(with Andreea Minca)
Dynamic Games and Applications, 12 (1), 258-287, 2022.

[J19] A Dynamic Contagion Risk Model with Recovery Features
(with Andreea Minca and Agnès Sulem)
Mathematics of Operations Research, 47 (2), 1412-1442, 2022.

[J20] Systemic Risk in Networks with a Central Node
(with Damir Filipović and Andreea Minca)
SIAM Journal on Financial Mathematics, 11(1): 60–98, 2020.

[J21] Optimal Equity Infusions in Interbank Networks
(with Andreea Minca and Agnès Sulem)
Journal of Financial Stability, 31: 1–17, 2017.

[J22] Resilience to Contagion in Financial Networks
(with Rama Cont and Andreea Minca)
Mathematical Finance, 26 (2): 329–365, 2016.

[J23] Uniqueness of Equilibrium in a Payment System with Liquidation Costs
(with Damir Filipović and Andreea Minca)
Operations Research Letters, 44(1):1–5, 2016.

[J24] To Fully Net or Not to Net: Adverse Effects of Partial Multilateral Netting
(with Damir Filipović and Andreea Minca)
Operations Research, 64(5): 1135–1142, 2016.

[J25] Inhomogeneous Financial Networks and Contagious Links
(with Andreea Minca)
Operations Research, 64(5): 1109–1120, 2016.

[J26] Control of Interbank Contagion under Partial Information
(with Andreea Minca and Agnès Sulem)
SIAM Journal on Financial Mathematics, 6(1): 1195–1219, 2015.

[J27] The Diameter of Weighted Random Graphs
(with Marc Lelarge)
Annals of Applied Probability, 25(3): 1686–1727, 2015.

[J28] Flooding in Weighted Sparse Random Graphs
(with Moez Draief and Marc Lelarge)
SIAM Journal on Discrete Mathematics, 27(1): 1–26, 2013.

[J29] Bootstrap Percolation in Power-Law Random Graphs
(with Nikolaos Fountoulakis)
Journal of Statistical Physics, 155 (1): 72–92, 2014.

[J30] Shortest-Weight Paths in Random Regular Graphs
(with Yuval Peres)
SIAM Journal on Discrete Mathematics, 28 (2): 656–672, 2014.

[J31] Stress Testing the Resilience of Financial Networks
(with Rama Cont and Andreea Minca)
International Journal of Theoretical and Applied Finance, 15 (1), 2012.

[J32] Upper Deviations for Split Times of Branching Processes
(with Marc Lelarge)
Journal of Applied Probability, 49(4): 1134–1143, 2012.

[J33] Bootstrap Percolation in Living Neural Networks
Journal of Statistical Physics, 141: 459–475, 2010.

[J34] Bootstrap Percolation and Diffusion in Random Graphs with Given Vertex Degrees
Electronic Journal of Combinatorics, 17: #R25, 2010.

Working papers

[W1] Dynamics of Cascading Losses in Locally Tree-Like Networks
(with Erfan Salavati)
Invited revision: Mathematics of Operations Research.

[W2] Brownian Motion on the Fubini Extension Space and Applications
(with Nina Amini, Sofiane Chalal and Gaoyue Guo)
Invited revision: Stochastic Processes and their Applications.

[W3] Ruin Probabilities for Risk Processes in Stochastic Networks
(with Zhongyuan Cao, Andreea Minca and Agnès Sulem)
Invited revision: Finance and Stochastics.

[W4] Oracle-Parametrized Constant Function Market Makers: From Price Feeds to Pricing Rules
(with Zachary Feinstein)

[W5] Strategic Attacks, Network Losses and Cascading Failures
(with Kaijiang Wu and Jorge Sefair)

[W6] Extended Graphon Mean Field Games in Discrete Time
(with Zhongyuan Cao, Gökçe Dayanikli, Mathieu Laurière, Kexin Shao and Agnès Sulem)

[W7] Graphon Quantum Filtering Systems
(with Nina Amini, Sofiane Chalal and Gaoyue Guo)

[W8] Duration-Dependent Stochastic Fluid Processes and Solar Energy Revenue Modeling
(with Andreea Minca and Oscar Peralta)

[W9] Local Weak Limits for Equilibrium and Risk in Economic Networks
(with Zhecheng Wu)

[W10] Optimal Stabilization of Supply Chain Networks
(with Amirmohammad Ebrahimi)

[W11] Optimizing Interventions in Economic Networks from Local Samples
(with Zhecheng Wu)

[W12] Sample Efficiency in Portfolio Selection under Heavy Tails
(with Amirmohammad Ebrahimi and Hongcheng Liu)

[W13] Graphon Mean-Field Games with Endogenous Interactions
(with Zhongyuan Cao, Pierre Cardaliaguet and Agnès Sulem)

[W14] Modeling Quantum Differential and Mean-Field Games
(with Nina Amini, Sofiane Chalal and Mathieu Laurière)

[W15] Stochastic Optimization on Large Sparse Interacting Networks
(with Zhecheng Wu)

Teaching Experience

University of Florida

- Decision Making Under Uncertainty (professional OEM master's program), 2025–present
- Engineering Economy (300+ students), 2022–present
- Introduction to Financial Technology, Spring 2024
- Advanced Engineering Economy, Fall 2023

Georgia State University

- Financial Engineering, Spring 2019–2022
- Machine Learning in Actuarial Science and Risk Management, Fall 2020–2022
- Risk Assessment Methods, Spring 2021–2022
- Financial Risk and Regulation, Spring 2019–2020
- Risk Modeling, Fall 2019
- Advanced Financial Risk Management, Fall 2018

University of Miami, Department of Mathematics

- Machine Learning in Quantitative Finance, Spring 2018
- Stochastic Calculus with Application to Finance, Spring 2018
- Introduction to Mathematical Finance, Fall 2017
- Quantitative Risk Analysis, Fall 2017
- Introduction to Probability and Statistics, Summer 2017
- Discrete Mathematics, Spring 2017
- Introduction to Mathematical Statistics, Spring 2016–2017
- Introduction to Probability Theory, Fall 2015–2016

Other Teaching

- Epidemic Modeling and Complex Networks, École Polytechnique, Spring 2013
- Exercises in Probability and Statistics, EPFL, 2012–2014

Advised PhD Students

- **Zhecheng Wu**, University of Florida, 2025–present
- **Amirmohammad Ebrahimi**, University of Florida, 2023-present
  Data-Driven Optimization in Financial and Economic Systems
- **Kaijiang Wu**, co-advised with Jorge Sefair, University of Florida, 2023-present
  Optimization Models and Algorithms for Scheduling and Cascading Network Disruptions
- **Carlos Nunez**, co-advised with Ajay Subramanian at Georgia State University, 2020-2022:
  General Equilibrium Models in Production Networks
- **Prerna Mishra**, co-advised with Alireza Aghasi at Georgia State University, 2020-2022:
  Financial Networks and Contagion: A Deep Learning Framework
- **Zhongyuan Cao**, co-advised with Agnès Sulem at INRIA Paris, 2020-2023:
  Systemic Risk, Complex Financial Networks and Graphon Mean Field Interacting Systems

Master's Project Supervision

Theo Boyer, Jevon Franklin, Tolga Koc, and Luisa Munoz (2025)
Golbarg Nazari, Michael Smith, Jordan Restrepo, Aaron Marquez, and William Jennings (2023)
Hector Alvarado Barreto (2021) and Zhongyuan Cao (2020)

Undergraduate Research Supervision

Ishaan Desai, Leah Weir, and Ivan Yuk (2026); Vincent A. DAngelo (2025)

Dissertation Committee

- Yuliang ZHANG (2024): "Financial Contagion and Instability", London School of Economics
- Shokoufeh Pourshahabi (2024): "Quantifying Economic Vulnerabilities Induced by Interdependent Networks", University of Florida

- Daniel Quiggin (2019): "Measuring Risk in Networks", Georgia State University

Professional and Institutional Service

Editorial and Grant Review

- Associate Editor, **Mathematical Finance**, 2020–
- Proposal Review, National Science Foundation (NSF)
- External Proposal Reviewer, Czech Science Foundation (GAČR)

Conference and Seminar Organization

- Program Committee, AI for Intelligent Financial Technologies (AIFT) Track, ACM Symposium on Applied Computing (SAC 2027)
- Program Committee, ACM International Conference on AI in Finance (ICAIF 2025)
- Program Committee, GSU–RFS FinTech Conference, Georgia State University and *The Review of Financial Studies* (2022)
- ISE Weekly Research Seminar Series, 2024–2025
- Session on "Blockchain in Finance and Insurance", INFORMS Annual Meeting 2022
- Session on "Systemic Risk and Network Models in Finance", INFORMS Annual Meeting 2021
- Session on "Stochastic Modeling and Financial Impacts of the Coronavirus Pandemic", SIAM Conference on Financial Mathematics and Engineering 2021

- Session on "Risk Management in Blockchain Systems", SIAM Conference on Financial Mathematics and Engineering 2021
- RMI Weekly Research Seminar Series, 2019–2021
- RMI Faculty Research Workshop, 2019–2020
- Session on "Financial Risk and Regulation", INFORMS Annual Meeting 2019
- Mini-symposium on "Network Models for Systemic Risk", SIAM Conference on Financial Mathematics and Engineering 2016
- Mini-symposium on "Funding and Market Liquidity in Financial Systems", SIAM Conference on Financial Mathematics and Engineering 2016

University Committees

- University of Florida:
  - ISE Professional Programs Committee
  - ISE Undergraduate Program Committee
  - Curriculum Committees for the HWCOE M.S. in Applied Data Science (MSADS) and M.S. in Artificial Intelligence Systems (MSAIS)
  - Curriculum Committee for the M.S. in Financial Engineering, including three graduate certificates in Financial Technology, Financial Mathematics and Optimization, and Risk Analysis and Management
  - ISE PhD Admissions Committee
  - ISE Faculty Search Committee
  - ISE MS Admissions Committee
  - ISE Awards Committee
- Georgia State University:
  - Robinson College of Business Faculty Affairs Committee
  - RMI Faculty Search Committee
  - RMI PhD Admissions Committee
- University of Miami:
  - Curriculum Committee for the M.S. in Mathematical Finance
  - M.S. Mathematical Finance Admissions Committee
  - PhD Admissions Committee
